WE SUPPORT

Hidden costs

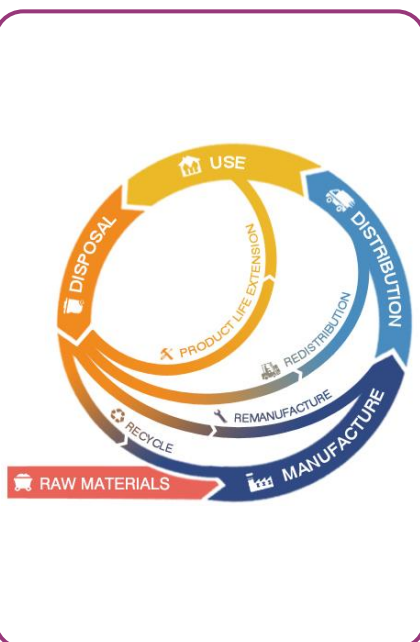

Because hidden risks are future costs

We believe

- Including Interdependencies and long term improve sustainable performance
- Social and environmental impacts have costs whether we measure them or not!

Our action

- Build financial model that include vertical value chain and horizontal lifecycle
- Model Cash flow optimization schemes and financial statements impact

- Build scenarios in forecasted Cash flows and financial statements
- Integrate the "afterlife", refurbishment and disposal in early product pricing and design
- Unveil and model the interdependence of various internal and external silos
- Develop transparency policies over the value chain for risk and return sharing
- Assessment of Company Value in case of reorganization, M&A or Spin-Off to include environmental and social risks in the value
